

CAVIAR & BULL

CASE STUDY

Our assignment was to install the sound system, which we solved with high-quality AUDAC devices in line with the exclusivity of the room. Although the sound system itself consists of few devices, we are proud that such a sophisticated and high-end restaurant has entrusted us with this task.

4 AUDAC VEX08 two-way loudspeakers and 2 AUDAC BAS015 subwoofers deliver music and sounds to match the size of the room. They are powered by an SMQ750 power amplifier with a WaveDynamics™ DSP processor and a 2.5" LCD display, with optional Dante™ capability for later expansion.

We were asked to provide the sound system for a really special venue, the private room of the Caviar&Bull restaurant in the Corinthia Hotel. "UNCENSORED" is an exclusive 10-table restaurant where guests are surrounded by a 360-degree audiovisual experience, 3D video mapping and authentic music from different projected countries.

CAVIAR & BULL

DEVICE LIST

- AUDAC SMQ750 power amplifier
- AUDAC WX802/O loudspeakers
- AUDAC WX802/O sub speakers
